ABOUT OUR COMPANY

We have over 20 years of experience in delivering customized software solutions to our customers. Our engineers have built and delivered near real-time stream processing applications, high-performance solutions, distributed operational data management infrastructure solutions, and custom web applications. Our team uses Agile Software Methodologies to consistently deliver quality software solutions.

We are adept at integrating commercial software into highly customized solutions to meet our customers' needs. Our methods include detailed Requirements Analysis, in addition to thorough testing as part of our Agile Development Process.

Our professionals are skilled at analyzing and improving upon existing business processes within an organization, and in meeting new standards of quality. We can provide customers with project management expertise to aid you in initiating, planning, executing, controlling, and closing the work of your team to achieve your goals.

- Requirements Analysis
- Software Testing
- Cyber Security

PAST PERFORMANCE

- “Working with Innovative Systems & Solutions has been nothing short of a professional delight. In addition to being a technical leader, they are also a trusted adviser. When presented with a high pressure scenario, their engineer remained collected and presented multiple paths for the team to take and ultimately arrive at a successful delivery. This was critical, as Innovative Systems & Solutions was the fulcrum that ensured the team was both functional and collaborative.”
- “Innovative Systems & Solutions has a can-do attitude and an indomitable spirit. They blend their technical experience with their customer management knowledge very well. They are a technical support manager’s favorite kind of engineer, the kind that takes one hint and can run with it to a solid solution for the customer.”
- “Their performance can only be summed up as “World-class”. Innovative Systems & Solutions was always well-prepared from the outset, knew all aspects of software development, training time lines, and matched our operational needs exactly. As an effective communicators and leaders, Innovative Systems & Solutions coordinated numerous software and training projects and collaboratively worked with many senior government and military leaders. All projects worked were completed with extremely favorable results even when faced with deadline pressures and minimal staff.”
